THEMATIC FOCUS

This year the theme of our Annual Conference is **“DIA - Digitisation Institutionalisation Artificial Intelligence”**. Charles Darwin, known for his theory of evolution said – “In the long history of humankind those who learned to collaborate and improvise most effectively have prevailed.” In this dynamic and rapidly evolving world, change is the only constant and to improve and evolve, we need to push the wheel of growth which seems possible if we abreast technology. In order to make this a reality, organisations need to navigate efficiently through many internal and external challenges. The reason being both success and failure are prevalent in a business and profession. In difficult situations it is essential for entrepreneurs to not lose their enthusiasm. However, enthusiasm is not the only weapon to fight this malady. This is because there is no short cut to hard work, ethics, integrity and determination. The recent pandemic has once again reinforced the need for future proofing of our organisations. Through this Annual Conference, which would be attended by business and professional entrepreneurs, ACAE is making an attempt to host various knowledge sessions wherein eminent speakers and experts from all across the country shall share their experience and thoughts on adapting technology, taking the digital transformation by **Digitisation**, making large organisation with **Institutionalisation** and decoding how **Artificial Intelligence** needs to be adapted for Future Proofing.
