Date: 6th August 2025

Face Authentication for e-Signing on the DDE Platform

We are pleased to announce that the DDE platform now supports Face Authentication for e-signing, enabled through UIDAI's newly introduced face authentication feature as an additional mode of Aadhaar-based authentication.

The UAT has been successfully completed by NeSL, and the feature is expected to go live by the end of August. This new capability offers a seamless, secure, and user-friendly e-signing experience.

We request all DDE users to take note of this update and initiate UAT implementation at their end. Completing UAT at your end will help ensure a smooth and timely go-live.

The below linked document provides step-by-step guidance on using the face authentication-based e-Sign process.
